

Seminar: DG Awareness with a Focus on Lithium Batteries

AIMS

In view of latest changes in the requirements of shipping dangerous good (DG) including lithium battery by air (effective from 01 January 2019), Carrier Liaison Group (CLG), Hongkong Association of Freight Forwarding and Logistics (HAFFA), The Hong Kong Shippers' Council (HKSC) and the Transport and Logistics Training Board – Vocational Training Council (VTC) would like to invite stakeholders of the industry to attend the seminar receiving the latest update on lithium battery requirements so as to enhance handling in cargo operations. Representatives from the CAD and CLG will provide attendees an overview of the 2019 requirements of shipping DG including lithium battery by air, as well as the introduction of DG AutoCheck by IATA. Considering that undeclaring, mis-declaring, mis-handling and improper shipping of DG including lithium battery by air might cause serious consequences, the seminar aims at raising the awareness of the industry, thereby enhancing safety in air cargo transport and maintain a good reputation of the Hong Kong air cargo industry.
